

HWRF Ensemble Prediction System Performance Hurricane Dorian (2019)

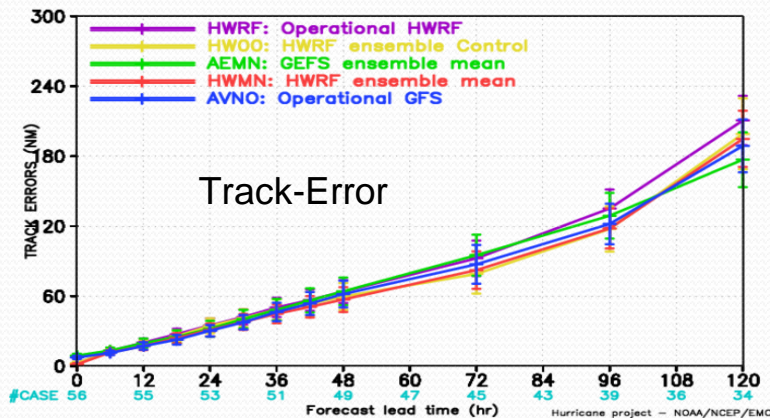

2019 HWRF ensemble Configuration

- Use then operational deterministic HWRF model except for
 - Reduced horizontal resolution: 14.5/4.5/1.5km vs. 18/6/2km
 - Reduced vertical resolution: L75 vs. L61 (L43 before 2018)
 - No GSI due to lack of GDAS data;
- IC/BC Perturbations (large scale): 20 member GEFS, 0.5x0.5 degree GRIB2
- Model Physics Perturbations (vortex scale):
 - Stochastic Convective Trigger Perturbations in SAS: -50hPa to + 50hPa white noise ;
 - Stochastic boundary layer height perturbations in PBL scheme, -20% to +20%;
 - Stochastic Cd perturbation;
- Situation-appropriate perturbations to the initial time position and intensity in TCVital.
- Initial ocean SST perturbations (Xiao Hui & Ryan Torn, added in 2017)
 - Climatological (2012-2016), GFS surface analysis
 - Remove climatological mean, scale to 0.5K standard deviation.
 - Mix the initial SST perturbation downward into upper ocean (150 m).

HWRF Based Ensemble Track Verification Dorian 05L, 2019

MODEL FORECAST — TRACK ERRORS (NM)
VERIFICATION FOR NATL BASIN 2019

MODEL FORECAST — ALONG TRACK BIAS (NM)

HWRF Based Ensemble Intensity Verification, Dorian 05L, 2019

FSP for Track and Intensity

Dorian 05L 2019

Frequency of Superior Performance for Track Forecast

Dorian 05L, 2019

Frequency of Superior Performance for Intensity Forecasts

Dorian 05L, 2019

HWRf ensemble mean outperformed the operational deterministic HWRf at most of forecast lead hours in terms of both track and intensity

Ensemble Track and Intensity Spread

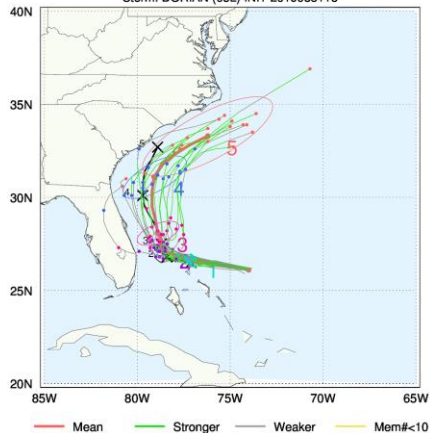

2019083018

HWMN Parallel: TC Tracks
Storm: DORIAN (05L) INIT 2019083018

2019090118

HWMN Parallel: TC Tracks
Storm: DORIAN (05L) INIT 2019090118

2019090218

HWMN Parallel: TC Tracks
Storm: DORIAN (05L) INIT 2019090218

Ensemble track spread well indicated uncertainty and reliability of the track and intensity forecasts from dynamic models
 Ensemble intensity is still under dispersed
 Stronger ensemble members tended to recurving earlier than weaker members
